

Comprehensive, independent tests

Wolmanit® CX has undergone extensive independent lab and field tests. Independent quality audits e. g. by SP Technical Research Institute of Sweden confirm that Wolmanit® CX achieves the best penetration levels in timber – a major criterion for achieving the required durability. Timber is protected only where the preservative is present – therefore the penetration is crucial.

Additional protection

During the installation of treated timber, it is oftennecessary to cut to size, drill or notch. These cuts should be re-treated with Wolmanit® C & T Brown, Cut & Treat, which ensures the integrity of the timber protection and colour.

Favourable environmental profile

By using home-grown timber treated with Wolmanit® CX, the service life of the wooden product is extended many folds and energy and cost are safed – for the environment and your pocket.

Wolmanit® CX – Durability to last a lifetime

- ✓ **20 years+ proven practical experience**
- ✓ **designed for high performance applications**
- ✓ **independent testing confirms best penetration and fixation**
- ✓ **environmentally friendly, extending the service life of timber**
- ✓ **safe: suitable for playground equipment**

Approved by leading quality schemes around the world

Congratulations on purchasing a quality timber product treated with Wolmanit® CX

Wood is a natural, sustainable building material that has excellent properties like high durability and elasticity. Outdoor timber is exposed to changing weather conditions and insect attack as well as fungal decay. This can harm the timber over time. State-of-the-art Wolmanit® CX wood preservative by BASF Wolman makes an important contribution to maintaining natural beauty of timber and extends the service life of the treated timber product.

20 years+ proven practical experience

Wolmanit® CX was introduced over 20 years ago and has been successfully used in manifold outdoor applications around the globe.

It is used for outdoor applications requiring the protection of timber – in-ground or above ground: e.g. for deckings, fences, playground equipment, car ports, claddings.

Used in high performance applications

Wooden roller-coasters are superb examples for timber typically preserved with Wolmanit® CX – whenever it really counts!

Safe: suitable for playground equipment

Wolmanit® CX fulfills national requirements and European laws. It can safely be used even for sensitive applications such as playground equipment.
